India's oldest fizzy drink Sosyo plans to become a national brand

Sosyo is a leading cold drink brand in India. It was first launched in 1923 by *Hajoori*, an Indian family-run company, based in the western state of Gujarat. Just like Coca-Cola, Sosyo's formula is a secret, kept within the family for three generations. The carbonated fresh juice drink has a 29% market share in Gujarat and has earned the honour of being ranked as one of India's top 1,000 brands.

5

Sosyo is manufactured in 18 factories in India. *Hajoori*, that still owns Sosyo, has ambitious plans to more than double the number of factories and increase Sosyo's market share in India over the next five years. The drink is bottled and distributed across India by 16 franchises and it can be found in over 95,000 outlets in the country.

10

Sosyo is exported to countries such as UAE, Zambia, USA, UK, New Zealand, South Africa, Canada and Australia. The business is planning to set up bottling plants in some of these countries rather than export the finished drink.

The Sosyo brand has a very small social media presence with less than 5,000 followers on Instagram and 670 followers on Twitter.

15

Hajoori wants to increase the market share for Sosyo in India. One way could be to offer more franchises to bottle and distribute the Sosyo drink.

Using the data in Extract H, evaluate whether franchising is the best way to increase Sosyo's market share in India.

Global market share of smartwatches 2022

A smartwatch is a computer-based wristwatch that provides many other features besides timekeeping such as monitoring the heart rate and tracking physical activity. Increasing health awareness among consumers is a key factor driving the growth of the smartwatch market.

5

In 2022, the global smartwatch market is expected to grow from \$56.15bn in 2021 to \$60.14bn despite some supply chain issues. In 2026, the market is expected to reach \$78.64bn. The market is dominated by *Apple*, a clear market leader ahead of other technology companies such as *Huawei* and *Samsung*.

Market share for smartwatches 2022

10

Company	Market share
<i>Apple</i>	33.5%
<i>Huawei</i>	8.4%
<i>Samsung</i>	8.0%
<i>iMoo</i>	5.1%
<i>Fitbit*</i>	4.2%
<i>Google*</i>	3.9%
Other	36.9%

15

*owned by *Alphabet*

Apple had strong growth in smartwatches, with a 13.3% increase in revenue to \$14.7bn in the first quarter in 2022 compared to the same quarter in 2021. *Apple* said that two-thirds of *Apple* Watch purchasers were first-time buyers of a smartwatch.

20

Extract G

Google launches its Pixel Watch

After months of waiting, *Google* has finally confirmed that it will launch its first smartwatch later in 2022. The smartwatch will be called the Pixel Watch and will be in direct competition with the *Apple* watch.

Google did not reveal a price for the new smartwatch, but it said it would be a premium priced product when launched. The Pixel Watch will have the health and fitness tracking tools of *Fitbit*. *Google* acquired *Fitbit* for \$2.1bn in 2019.

5

Using Porter's five forces and the data in Extracts F and G, evaluate whether the threat of substitutes is the most important external influence on *Apple*.
